INTRODUCTION

We appreciate your interest in **COTTAGE MAKERS** And we are Proud to introduce ourselves as one of the Oldest in the Pre-Fabricated & Wooden houses construction Industry in **INDIA**.

The Company was founded by Mr. Amrik Singh Matharu in the year 2000 which quickly established a name in the wood house making industry.

Image of the oldest and the very first Cottage Built back in the year 2000 in Lonavala for our Very First Client

Back in the Days we started making houses from Marine Grade Plywood which was then Laminated or Painted on Both Sides.

What Surprises is that this was just a temporary structure built to last for 3-4 yrs but sustained was dismantled and in the year 2006 after it served its purpose to the client.

The Journey then Continued and we stuck to the same building method while exploring for newer & Better alternatives.

OUR EARLY YEARS 2000-2008

The Journey Continued and by 2006 we had already worked on a hand full of projects for our clients all while working on newer alternatives for future projects. (Cloud 9 resorts.)

OUR EARLY YEARS 2000-2008

In 2007 we started the first change, stepped up the game and made a pre-fab structure with wooden framing and cement boards, surprisingly 70% of the work on this was in the factory. A true pre-fab house in every sense.

TRANSITION YEARS 2008-2010

For a very Brief Period we developed and started construction of Single Panel T&G (Tongue & Groove) houses it was very short lived as we understood that these were not suitable for hotter climate conditions due to lack of insulation however here are some projects which weren't as successful due to the hotter climatic conditions of Maharashtra.

TRANSITION YEARS 2008-2010

It was a quick shift from T & G Cottages to Timber framed wooden houses which were better in construction and had really good acoustics along with being more aesthetically appealing.

THE BIGGER THE BETTER 2010- PRESENT

After the quick shift to Timber frame houses we soon found the confidence to go bigger with the sizes growing horizontally as well as starting from small Ground plus One story to larger structures upwards of 5000 SQF in area.
